EMC APPLICATIONXTENDER 7.0
Affordable, Instant Document Management

ESSENTIALS

- Rapid deployment and easy administration
- Direct access to stored documents, reports, and information from virtually any MS Windows desktop application, Internet Explorer/Chrome/Safari/Mozilla Firefox web browsers, or MS Office applications including Outlook, Word, Excel and PowerPoint
- Ease of use enhancements and easy integration with existing business applications-without the need for additional programming
- Simple-to-configure Retention Manager that helps define document retention, disposition policies, and compliance requirements
- Expanded application support for MS Windows 7/8, MS Windows Server 2008/2012, and MS Windows/.NET frameworks, including SQL 2012 and Adobe 11.0
- Fully internationalized and localized as a world-class global document management solution

EMC ApplicationXtender® delivers the power of an instant document management system to make your information more affordable to store, manage, and share, providing instant business results. Designed to meet the budget and functional requirements of enterprise departments and midsize organizations, EMC ApplicationXtender is an instant document management solution that reduces costs by streamlining the capture and management of documents – helping you to minimize the challenges associated with managing paper.

EMC ApplicationXtender leverages your existing IT infrastructure to electronically store, organize, and manage virtually any kind of business content. Easy to implement, integrate, and manage—providing instant, role-based access to content from a desktop interface, web browser, MS Office applications and MS SharePoint web parts. EMC ApplicationXtender is based on an easy-to-use MS Windows/.NET-optimized system and provides many out-of-the-box features that make it simple to create, modify, and implement business solutions without IT support.

The EMC Documentum xPlore Full Text Search Engine is now fully integrated with EMC ApplicationXtender and provides powerful search capabilities to make relevant information easier to access. Additionally, EMC has made huge strides in the core technologies used in EMC ApplicationXtender to ensure the platform will be around for the next decade by re-architecting many of the key components to support the latest IT infrastructures and operating systems, preserving existing customers' investments.

POWERFUL SEARCH CAPABILITIES

For organizations with indexing requirements, a Full-Text Indexing Server exists that gives users the ability to search unstructured data by providing various advanced search methods to quickly and easily locate specific information. Full-text searches can be performed on a variety of document formats, including COLD/ERM documents, text renditions of image documents (OCR'd images), HTML and XML, as well as many third-party application documents such as MS Word®, WordPerfect®, MS Excel® or Adobe® PDF. With most file formats, all search hits are highlighted directly on the document, and users can easily navigate between hits by the click of a button.

Various powerful search methods, such as simple word, wildcard, stemming, proximity, thesaurus and searches, make information easier to find. Also, text searches can be combined with EMC ApplicationXtender keywords or date range searches to define and limit the documents returned. These searches are significantly faster than regular text searches.

EMC²

FULL TEXT INDEXING

The key features of EMC ApplicationXtender full text search engine are the following:

- Powerful search functionality

- High performance and scalability

- Improved supportability and ease of use

- Combine keyword and full-text searches for a powerful solution that quickly returns precise, search results

- Perform advanced search functions without complex search syntax, including typo, thesaurus, stemming, proximity and wildcard searches

- Search more than 200 file formats out of the box

- Provide role-base user access to ensure appropriate access to information

FUTURE-PROOFED FOR THE NEXT DECADE

Organizations are currently upgrading to the latest operating systems, servers, databases, and browsers to name a few. Many of the core EMC ApplicationXtender components have been upgraded to run natively on 64-bit MS Windows Servers. Some of these new components include the EMC ApplicationXtender web server, database interfaces, and new full text search architecture, providing greater scalability and performance.

The Chrome bowser is now fully supported in EMC ApplicationXtender 7.0 in addition to Internet Explorer, Safari, and Firefox browser support. With this release, EMC ApplicationXtender also supports MS Windows 8.0/8.1 and MS Windows Server 2012/2012R2.

A GLOBAL DOCUMENT MANAGEMENT SYSTEM

EMC ApplicationXtender 7.0 has full support of English, French, Italian, German, Spanish, Brazilian Portuguese and Simplified Chinese languages. The EMC ApplicationXtender User Interfaces for both Desktop and Web Client are also localized in these languages, to include online help functions and user guides.
